

Landmark Hospital of Columbia, MO under construction

Building of a long term acute care hospital (LTAC) is underway in Columbia, MO. The 42 bed facility located at 604 Old HWY 63 is anticipated to be completed in mid-September. This is the 4th center opened by the company. Other facilities are located in Cape Girardeau and Joplin, MO and Athens, GA.

Landmark Hospitals are Critical Care Facilities designed to provide an appropriate environment for very ill, yet stable patients. These facilities are dedicated to providing primary care for patients requiring a hospital stay of 25 days or longer and whose treatment plan falls between those offered at traditional hospitals and nursing homes. Landmark Hospitals specialize in aggressive ventilator weaning and has a high Respiratory Care Staff to patient ratio. Additional areas of concentration are pulmonary care, complex wound care, dialysis, infectious disease treatment, long-term antibiotic therapy and post trauma recovery and rehabilitation. Landmark Hospital utilizes a multi-disciplinary team approach when developing and implementing the patient's plan of care. This includes respiratory care, nursing, occupational and physical therapy, pharmacy, dietary, case management, and social services.
